Vana Mahotsava Photography Contest

- from 01 July 2025 till 10 July, 2025 -

It's time to celebrate Vana Mahotsava!

Schools all over India will celebrate Vana Mahotsava by planting tree saplings.

It's an excellent way to help nature.

But have you observed one thing?

Before planting the sapling, the weeds growing there, mostly herbs, are often cleared away.

When one is destroyed, another is taken care of! Is that fair?

Herbs may seem small and unimportant, but they are nature's helpers.

- They grow quickly on bare soil, stopping it from being washed away.
- They save the topsoil, water, and nutrients.
- They also make the soil healthy for other plants to grow.
- Some weeds are edible, and others have medicinal value.
- Herbs are used in Ayurveda and herbalism.
- They also provide homes for insects and birds.
- Over 5,000 types of insects and birds depend on herbs to survive.
- Herbs help maintain the Earth's temperature making it suitable for many small insects to survive.
- Some insects even require a particular type of herb for their survival!

If herbs disappear, many animals and insects will vanish too.

Nature is like a big family where every plant, big or small, plays a role.

On this Vana Mahotsava, while planting saplings of trees, let's also explore the world of smaller plants, classified as herbs, normally treated as weeds.

They are also essential in keeping our Earth green and alive!

Let's Care for All Plants!

Each Participant has to:

- ☐ Locate a small unique herb in the nearby surroundings.
- ☐ Place a coin near the plant and take a photo of the plant, using a mobile.
- ☐ At least a portion of the coin needs to be visible in the photo to ensure that it is taken by the participant and not copied from the internet.
- ☐ Using "Google Lens", identify the plant.
- ☐ Research a little to find something interesting about the plant.
 - ☐ Its medicinal value, if any.
 - ☐ How it helps the ecosystem.
 - ☐ If any particular insect depends on this plant for its survival.
 - ☐ Any other uses or useful information.
- ☐ Email us (updates.bhavans@gmail.com) the photo, name of the plant, location where it was found and the interesting facts in one or two lines along with the following details.
 - o Full Name o Roll Number o Class o Division
 - o School name with full postal address along with pincode
- ☐ The contest is open from 01 July 2025 to 10 July 2025.
- ☐ Only entries received during these dates will be considered.
- ☐ Entries should be sent by email to updates.bhavans@gmail.com and bvb.rjyactivity@gmail.com
- ☐ One entry/one photo per student will be allowed. Multiple entries will lead to disqualification.

Teachers Orientation Programme

(Bhimavaram, Palakol, Rajahmundry, Tadepalligudem, Kakinada)

9th June, 2025 & 10th June 2025

Teacher orientation programmes offer an opportunity to enhance pedagogical knowledge and implement effective instructional strategies.

2-days In-service training programme was organized by Bhavan's Bhimavaram Kendra for the teachers of all the 5 branches (Bhimavaram, Tadepalligudem, Palakol, Rajahmundry and Kakinada) on 9th June and 10th June 2025 in which all the teachers participated. Eminent resource persons shared insights on teacher professional development in the context of rapidly changing world.

First Day of School after Summer Vacation

Welcome back after a refreshing summer break! Let's dive into new learning adventures and achieve academic success together. Exciting opportunities await us this year.

"Kickstart the school year post-summer! We're thrilled to see everyone back. Let's turn summer stories into classroom learning and make this year fantastic."

Mathematics Activity by class-4

Children need many opportunities to learn about shapes. It is important for them to identify and understand the different shapes and their parts. Children are exposed to shapes in their environment every day. They see and interact with them everywhere. They need to recognize shapes, verbalize what they see, and understand why they are there.

MATHS
CLASS IV

Hands-on activities are the key to keeping kids engaged and excited when teaching them geometry and shapes. Whether exploring basic shapes like squares and triangles or diving into more complex concepts, interactive activities make learning these topics fun and memorable.

International Yoga Day

The International Day of Yoga (IDY) 2025 marks a significant milestone, the 11th anniversary of this global celebration. Under the theme “Yoga for One Earth, One Health,” this year's observance highlights yoga's vital role in promoting holistic well-being and environmental harmony. Over the past decade, IDY has evolved into a worldwide movement, uniting millions in the practice of yoga to enhance physical, mental, and spiritual health.

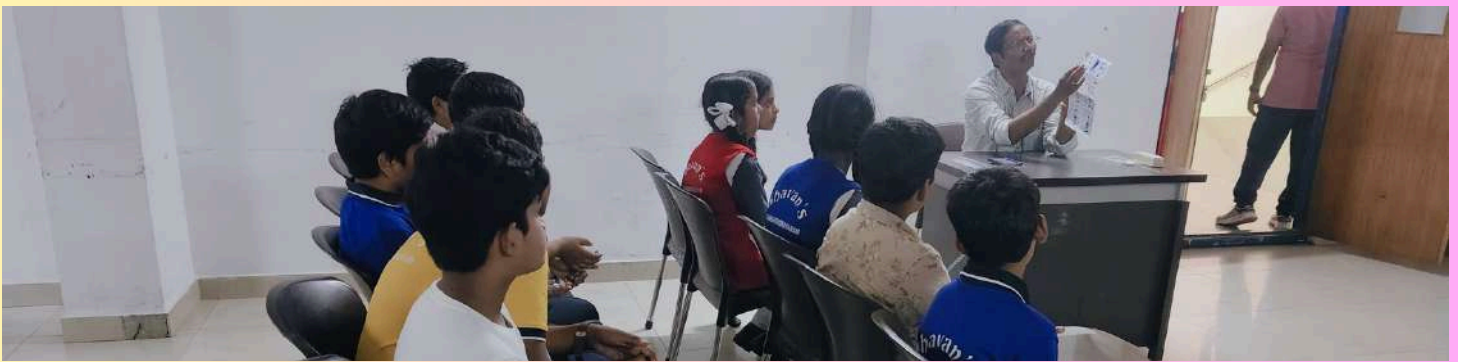

International Yoga Day was celebrated by the students and teachers at Bharatiya Vidya Bhavan's Residential Public school, Rajahmundry with great enthusiasm. Students of Grade I to X demonstrated various yoga asanas. Warm up exercises were taken and all the students performed sitting and standing asanas, importance of these were explained simultaneously. The celebration concluded with synchronized recitation of slogans and speech by our Principal. He encouraged students to practice yoga regularly to remain fit and improve concentration.

Student Council Elections

The Student Council plays an active role in decision making at the school. Its purpose is to serve as a connection between the Student body and the Administration. The Student Council provides an opportunity for members to conduct formal meetings and express themselves in a responsible manner. The Council promotes leadership and encourages students to initiate activities for general welfare of the School community.

The school council election is conducted on 28 June 2025 at Bharatiya Vidya Bhavan's residential public school, Rajahmundry, with the aim of fostering democratic values, leadership skills and civic responsibility among students. The event was organised under the supervision of the school principal, academic coordinator, chief school election commissioner, housemasters, associate housemasters, social studies department and physical education department and other committee members by following a transparent and inclusive electoral process. The objectives of the activity is as follows, to elect student representatives for the school governing body, to provide students with first-hand experience of democratic processes followed by our country, to encourage leadership, teamwork and accountability

After scrutiny of the nomination forms, from 36 members, 29 were found eligible candidates for the above mentioned posts. Second, campaigning. The candidates are done campaigning to the voters from class 6 to class 12.

Voting is conducted using ballot papers. Designated polling booths were set up and trained students and teachers acted as volunteers and officers. Voters' index fingers were marked with ink to prevent multiple voting, mirroring real-life practices

Students gained practical knowledge of democratic systems. The election promoted inclusivity, responsibility and student engagement. Elected leaders began planning initiatives for school improvement and student welfare.

“Leadership is not about being in front; it’s about empowering those behind.”

The Heart of Teaching English

Teaching has always been a joyful experience for me, especially when I spend time with children in the classroom, I love helping them learn/guiding them through the English language and watching them grow with confidence.

Sometimes, their spelling mistakes or mispronunciations bring a smile to my face-not because they're wrong but because they are learning. Each small error is a sign of progress.

I always encourage my students to improve their language by learning new words every day. Vocabulary is the key to better communication, and every new word brings them one step closer to expressing themselves clearly and confidently.

Let's enjoy the journey of learning English-together, with joy

G. Chandrakala, PGT Eng

STUDENTS CORNER:

My Family

My family takes care of me,
which I cannot find anywhere.
I am so grateful to them
that I cannot compare
their kindness, and all I can
do for them is to offer prayer.
My mother is so kind
Her love is blind and undefined
My Grandpa is God's gift,
Which makes me uplift.
Our relation will never drift.
My Grandma is my best friend,
our relationship will always extend.
It will never end.
My aunt is so lovely,
without her, I feel so lonely.
I want her to be with me early,
I love everyone in my family equally.

How AI is Revolutionizing Farming in India

Rishika, IX-A

Introduction

Artificial Intelligence (AI) is smart technology that can think and learn like humans. It's transforming many areas, including farming in India, making it more efficient and productive.

The Current state of farming in India:

Indian farmers face challenges like unpredictable weather, pests and poor market prices. These issues make farming hard and less profitable.

Introduction to AI farming:

AI uses computers to analyze data and provide useful advice, tools like smart sensors, drones and robots help farmers work more efficiently.

AI Applications in Indian Farming

Precision Agriculture: AI tools analyze precise crop care advice, helping farmers use resources effectively.

Predictive Analytics: AI predicts weather changes and pest attacks, helping farmers protect their crops.

Automated Machinery: AI powered tractors and harvesters perform tasks automatically reducing manual labour.

Smart Irrigation System: AI controls irrigation to give crops the right amount of water, saving water and keeping plants healthy.

Market Access: AI platforms connect farmers with buyers, helping them get better prices and market information.

Case Study:

In Maharashtra, AI drones check Crop health and predict yields, increasing farmers income by 20%. In Punjab, an AI platforms provides real-time market prices, helping farmers make better decisions.

Challenges and future Prospects: A cropping AI widely faces challenges like high costs and technical training needs. However, with government and private sector support, these can be overcome. AI promises a bright future for Indian farming.

Conclusion: AI is transforming farming in India by solving problems and creating new opportunities. embracing AI technologies can lead to a more successful and sustainable future for Indian farmers.
